

Release Notes:

This program assumes

- the IP address part of the address is 127.0.0.1
- all the html, jpg, mp3, and mp4 files are stored in the same folder as the myServer.java. Otherwise the program will not be able to find the files, a 404 Not Found might display.
- After the program starts it will continuously listens for connections, it will not know when to stop the program, so a brute force method like closing the terminal will shut it down.
